Question:1

Which statement adds a column with the largest integer data type?

- A. ALTER TABLE SCIENTIFIC ADD scientific_valueBIGINT;
- B. ALTER TABLE SCIENTIFIC ADD scientific_valueINTEGER;
- C. ALTER TABLE SCIENTIFIC ADD scientific_valueDECIMAL(15,10);
- D. ALTER TABLE SCIENTIFIC ADD scientific_valueDECIMAL(10,10);

Answer: A

Question:2

Assume that MySQL Enterprise Monitor is configured to monitor MySQL 8.0.10 or a later instance. Which three features are available?

- A. creating e-mail alerts and SNMP traps for MySQLwarnings
- B. starting and stopping the MySQLinstance
- C. analyzing executed MySQLqueries
- D. deploying MySQL agent on supported target operatingsystem
- E. monitoring the availability of the MySQLInstance
- F. tracing import and export with my sql dump

Answer: ADF

Question:3

MySQL Enterprise Masking and De-identification can hide or obfuscate sensitive data, by controlling how the data appears. Which three are MySQL Enterprise Masking and De-identification functions?

- A. misspelling
- B. strict or relaxed masking
- C. random data substitution
- D. white listing and substitution
- E. dictionary substitution

Answer: BCE

Explanation:
Robust Data Masking Functions

MySQL Enterprise Masking and De-identification can hide or obfuscate sensitive data, by controlling how the data appears. It features robust masking algorithms including selective masking, blurring, random data substitution and other special techniques for credit card numbers, account numbers and other personally identifiable information, enabling IT departments to maintain structural rules to de-identify values. MySQL Enterprise Masking and De-identification functions include:

- Selective Masking - Obscures a particular portion of numbers or strings such as phone numbers, and payment card numbers.
 - Strict or Relaxed Masking - Implement strict or relaxed masking to obfuscated data.
 - Random Data Substitution - Replace real values with random values while maintaining format consistency.
 - Blurring - Add a random variance to existing values such as randomized numeric ranges for salaries.
 - Dictionary Substitution - Randomly replace values from task specific dictionaries.
 - Blacklisting and Substitution - Replace specifically blacklisted data, but leave non-blacklisted in place.

Question:4

You have been using `mysql dump` for logical backups of your MySQL databases. Your MySQL database size has been growing. Which two options can reduce the backup size and speed up the backup time?

- A. Use `mysqldump` with `--incremental` together with the `--compress` option to back up incrementally based on previous full backup and compress the incremental backup files.
- B. Use `mysqldump` with the `--changes` only option.
- C. Use MySQL Enterprise Backup with the `--size=compress` to compress the backup file.
- D. Use MySQL Enterprise Backup with the `-- incremental` policy to back up incrementally based on previous full backup.
- E. Use MySQL Enterprise Backup with the `--compress` option to compress the backup files and use `--compress-level` to select the level of compression.

Answer: B,E

Question:5

Which statement would you use to remove the population column from the city table?

- A. `ALTER TABLE city DROP population;`
- B. `DELETE population FROM city;`
- C. `ALTER TABLE city DELETE population;`
- D. `ALTER TABLE city LESS population;`
- E. `DROP population FROM city;`

Answer: A
