Question: 1

Your network contains an Active Directory domain named contoso.com. The domain contains a Web server named www.contoso.com. The Web server is available on the Internet. You implement Direct Access by using the default configuration.

- A. Direct Access Client Experience Settings
- B. DNS Client
- C. Name Resolution Policy
- D. Network Connections

Answer: C

Question: 2

Your network contains an Active Directory domain named contoso.com. All user accounts for the marketing department reside in an organizational unit (OU) named OU1. All user accounts for the finance department reside in an organizational unit (OU) named OU2. You create a Group Policy object (GPO) named GPO1. You link GPO1 to OU2. You configure the Group Policy preference of GPO1 to add a shortcut named Link1 to the desktop.

- A. Enforce GPO1.
- B. Enable loopback processing in GPO1.
- C. Modify the Link1 shortcut preference of GPO1.
- D. Modify the Security Filtering settings of GPO1.

Answer: D

Question: 3

Your network contains an Active Directory domain named contoso.com. The domain contains a domain controller named DC1 that runs Windows Server 2012 R2. All client computers run Windows 8 Enterprise. DC1 contains a Group Policy object (GPO) named GPO1. You need to deploy a VPN connection to all users. What should you configure from User Configuration in GPO1?

- A. Policies/Administrative Templates/Network/Windows Connect Now
- B. Policies/Administrative Templates/Network/Network Connections
- C. Policies/Administrative Templates/Windows Components/Windows Mobility Center
- D. Preferences/Control Panel Settings/Network Options

Answer: D

Question: 4

Your network contains an Active Directory domain named contoso.com. All client computers run Windows 8.1. The network contains a shared folder named Financial Data that contains five files. You need to ensure that the Financial Data folder and its contents are copied to all of the client computers. Which two Group Policy preferences should you configure? (Each correct answer presents part of the solution. Choose two.)

- A. Shortcuts
- B. Network Shares
- C. Environment
- D. Folders
- E. Files

Answer: D, E

Explanation:

Folder preference items allow you to create, update, replace, and delete folders and their contents. (To configure individual files rather than folders, see Files Extension.) Before you create a Folder preference item, you should review the behavior of each type of action possible with this extension.

Question: 5

Your network contains an Active Directory domain named contoso.com. All domain controllers run Windows Server 2012 R2. You have a Group Policy object (GPO) named GPO1 that contains hundreds of settings. GPO1 is linked to an organizational unit (OU) named OU1. OU1 contains 200 client computers.

You plan to unlink GPO1 from OU1. You need to identify which GPO settings will be removed from the computers after GPO1 is unlinked from OU1.

Which two GPO settings should you identify? (Each correct answer presents part of the solution. Choose two.)

- A. The managed Administrative Template settings
- B. The unmanaged Administrative Template settings
- C. The System Services security settings
- D. The Event Log security settings
- E. The Restricted Groups security settings

Answer: A, D

Question: 6

Your network contains an Active Directory domain named contoso.com. All domain controllers run Windows Server 2012 R2. The domain contains 500 client computers that run Windows 8.1 Enterprise and Microsoft Office 2013. You implement a Group Policy central store. You need to modify the default Microsoft Office 2013 Save As location for all client computers. The solution must minimize administrative effort.

What should you configure in a Group Policy object (GPO)?

- A. The Group Policy preferences
- B. An application control policy
- C. The Administrative Templates
- D. The Software Installation settings

Answer: A

Question: 7

Your network contains an Active Directory domain named contoso.com. All domain controllers run Windows Server 2012 R2.

The domain contains 200 Group Policy objects (GPOs).

An administrator named Admin1 must be able to add new WMI filters from the Group Policy Management Console (GPMC).

You need to delegate the required permissions to Admin1. The solution must minimize the number of permissions assigned to Admin1.

What should you do?

- A. From Active Directory Users and Computers, add Admin1 to the WinRMRemoteWMIUsers__group.
- B. From Group Policy Management, assign Creator Owner to Admin1 for the WMI Filters container.
- C. From Active Directory Users and Computers, add Admin1 to the Domain Admins group.
- D. From Group Policy Management, assign Full control to Admin1 for the WMI Filters container.

Answer: D

QUESTION 8

You have a Windows Server Update Services (WSUS) server named Server1. Server1 synchronizes from Microsoft Update. You plan to deploy a new WSUS server named Server2. Server2 will synchronize updates Server2 will be separated from Server1 by a firewall from Server1. You need to identify which port must be open on the firewall so that Server2 can synchronize the updates. Which port should you identify?

- A. 8530
- B. 3389
- C. 443
- D. 80

Answer: A
